KASTHURI SATHISH

Senior Product Owner — AI & Enterprise Platforms

Bengaluru, India | +91 82707 47747 | kasthuri.vision@gmail.com | LinkedIn | GitHub | Live Portfolio | **Immediate Joiner**

PROFESSIONAL SUMMARY

Senior Product Owner with 10 years in enterprise software, bridging business strategy, user requirements, and technical execution across FinTech, Automotive, Healthcare, and Travel domains. Experienced in owning digital customer onboarding platforms, leading workflow automation, and driving GenAI proof-of-concept initiatives (RAG, prompt guardrails, Amazon Bedrock). PSPO I certified and GUVI Master Data Science Program certified with hands-on technical capabilities in Python, SQL, and LLM evaluation.

CORE COMPETENCIES & TECHNICAL SKILLS

Product Ownership:	Product Roadmaps, Backlog Prioritization, PRDs, User Stories, Acceptance Criteria, Scrum / Agile, Sprint Planning, Release Coordination, UAT, Stakeholder Management
Generative AI & ML:	Retrieval-Augmented Generation (RAG), Prompt Guardrails, Hallucination Mitigation, Sentence Transformers, Amazon Bedrock, Google Gemini API, Scikit-Learn, TensorFlow
Tech & Platforms:	Python, SQL, Streamlit, Hugging Face Spaces, Jira, Confluence, Azure DevOps, Git, REST APIs, Test Automation

PROFESSIONAL EXPERIENCE

Capgemini — Senior Consultant **PROMOTED** — Apr 2023 – Jul 2026 | Bengaluru, India

- **Digital Platform Ownership:** Owned product delivery and backlog prioritization for a customer onboarding and offer management platform, aligning roadmap features with business and regulatory compliance requirements.
- **Agile Delivery Leadership:** Managed sprint planning, backlog refinement, and release coordination across cross-functional engineering and QA teams; authored PRDs, user stories, and acceptance criteria in Jira and Azure DevOps.
- **GenAI Pilot Initiative:** Led an internal proof-of-concept (POC) using Amazon Bedrock and RAG for automated policy and financial document review; defined functional requirements, citation standards, and prompt guardrails to reduce hallucinations.

Capgemini — Consultant — Mar 2021 – Mar 2023 | Bengaluru, India

- **Workflow Automation Delivery:** As Proxy Product Owner and Automation Lead, managed functional requirements, user story backlog, and sprint priorities for an end-to-end workflow automation solution for a global automotive client.
- **Backlog & UAT Readiness:** Authored system workflows and technical acceptance criteria; maintained specifications in Confluence and coordinated User Acceptance Testing (UAT) with business stakeholders.

Datamatics Global Services — Associate Consultant — May 2019 – Mar 2021 | Chennai, India

- Served as Product Owner Proxy and Test Lead for enterprise workflow automation initiatives; aligned functional requirements and sprint backlogs in Jira, leading sprint readiness reviews and regression sign-offs.

Prior Roles: Test Analyst at Stradegi Solutions (Jul 2018 – Apr 2019) | Software Test Engineer at Tekshapers Software Solutions (Feb 2018 – Jun 2018) | Associate Software Engineer at IGT Solutions (formerly InterGlobe Technologies) (Jun 2015 – Apr 2017)

- Led automation and backlog validation initiatives, refined acceptance criteria with Product Managers, and executed backend data verification using SQL.

SELECTED AI & DATA SCIENCE PROJECTS

AI Financial Research Assistant | RAG, Gemini API, Bedrock, Sentence Transformers, Streamlit — GitHub ↗

- Built an end-to-end RAG assistant querying financial reports from a practice dataset with Sentence Transformers semantic search; defined 3 prompt guardrails (context-only grounding, fallback message, and page-level source citations); tested against 25 curated financial queries comparing Gemini vs Claude.

Education Regulation Impact Analyzer | Gemini 1.5 Flash, NLP, Streamlit, Hugging Face — Live App ↗ | GitHub ↗

- Built and deployed a live policy circular analyzer translating dense circulars into plain-language summaries, timelines, and stakeholder-specific impacts (Students, Faculty, Administration); tested extraction on 15 policy circulars with human-in-the-loop review flags for ambiguous deadlines.

CryptoCast: Bitcoin Forecasting System | Random Forest, LSTM Neural Network, Streamlit — GitHub ↗

- Built a multi-horizon (1D/3D/7D) Bitcoin price forecasting system evaluating Random Forest vs LSTM Deep Learning over 60-day sequence windows, providing error metrics (MAE/MAPE) directly in the Streamlit UI.

EDUCATION & CERTIFICATIONS

Certifications: PSPO I — Scrum.org (Certified Professional Scrum Product Owner) | **Master Data Science Program** — GUVI (IIT Madras-incubated) | **Generative AI for Product Managers** — IBM / Coursera (Specialization Certificate)

Education: Bachelor of Engineering (B.E.) — Sethu Institute of Technology (2013) | **Location:** Bengaluru, India | **Availability:** Immediate Joiner
